

BARCODE X APPLICATION

Simplicity and Performance That You Expect From Peninsula

Peninsula Barcode can make over 180 kinds of barcode either as a graphic for incorporation into artwork, or as labels printed on your printer.

Full control over the style and size of the barcode is provided on one simple to use tabbed window. Peninsula Barcode contains controls for bar width reduction in microns, height and width in mm, inches and SC sizes.

There are controls to change the style of the barcode, the colour and text underneath. In addition to this Peninsula Barcode can make serially numbered barcodes, import barcode numbers as a batch from csv and tab files and even tells you when the barcode will not scan due to its' colour.

Peninsula 2 Minute Setup As Standard

Peninsula Barcode comes with a simple installer to install all you require. When you start the Barcode application simply choose the barcode type you require, type the number and press return, the barcode will appear on screen in front of you. Then click on the barcode to save it.

Powerful High End Features Built In

Barcode has many unique features built in, it outlines the type beneath EAN codes so you have no need for extra fonts.

Barcode has a hotkey feature which allows you to pop it up from any application, create a barcode and be instantly taken back to your application.

You can save custom barcode types with individual customers requirements, you can even adjust the text baselines or track the text.

Auto Code ID Built In

Peninsula Barcode can identify and produce copies of codes when teamed with our Phoenix II barcode scanner. Simply scan the barcode you have and Barcode will reproduce it. All eps files made with barcode also have a self check feature, simply drop the file onto Barcode to see the settings the file was made with, especially useful for checking size and BWR settings before printing.

Outstanding Value In The Marketplace

Barcode is the most comprehensive barcode application available today, everything is built in, there are no extras to buy and you can create barcodes straight after instalation. Barcode has been developed over 18 years and is now in its 11th version.

Fully Cross Platform Compliant

Cross Platform Compliant Mac - PC
Mac OS 7 - 9.2 and also on all versions of Mac OSX.

Works on PC Windows all versions including XP, 2000

FEATURES

- Create Over 180 Barcode Types, including RSS and Datamatrix
- Simple One Window Tabbed Intuitive Interface
- Complete Height Width and BWR adjustments
- Over 100 Style Options
- Full Control Over Text Style, Including Tracking
- Full Control Over Colour, Including Spot Colour
- Control Over Boxes, Lines, Insets and many more options
- Export Illustrator EPS, PICT, Metafile, BMP, PDF, even Text
- Batch Processing Of Serial Numbers
- Batch Processing Of Imported Numbers (csv and tab)
- Fully Automation Scriptable Mac and PC
- Built In Labelling Module, Sheet or Reel Fed Labels
- Auto Code ID when using Phoenix II Scanner
- Hotkey Access From Any Application (OSX only)
- Free Lifetime Support, No Renewal Fees
- Mac OSX, OS9 and Windows XP Versions Available

USES

- Design
- Advertising
- Marketing
- Packaging Design
- Retail
- Healthcare and Medical
- Inventory and Stock Control
- Office Automation
- Light Industrial
- Document, Asset and ItemTracking
- Library Applications

PLATFORMS

Macintosh Computers OS7-9.2.2, OSX 10.2, 10.3 and above
PC Windows 95, 98, Millenium, 2000, 2003 and XP
No minimum requirements

'Barcoding Made Easy'

Choose a barcode type from the menu

Enter Barcode data in the boxes

Set an export type (ie eps, pdf, bmp)

Set Magnification (mm, inches or SC)

Set Height (mm or inches)

Easy BWR menu

Click to generate

Click here to for main screen

Click here to make Serial numbers

Click here to change options

Click here to change background colour

Click here to change barcode colour

Click here to import data from a file

Click here to see sizes

Click here to change text styles

And here's the barcode. Just click on it, or the "Export Code" button, to save it

Bank On Peninsula Experience

We provide the most comprehensive, accurate, and cost effective solution in the Barcoding Industry today.

We back our products with a Free Full Technical Support service via email and a Technical Support Website.

We have over 18 years experience of Barcoding Software and are proud to have as our customers companies such as Marks & Spencer, Dyson, Black & Decker, Pedigree Pet Foods, IKEA, Elsevier, Apple Computer and Cambridge University Press.

We are here to help, give advice and guide you when you need to use barcoding or labelling in any aspect of your business.

Please feel free to call us, even if you are only evaluating the options.
